

# ***WENS Scholarship***

## ***Frequently Asked Questions***

**NOTE: The FAQ's are for both Master's and PhD Students. If you have other questions, contact to [labwens@gmail.com](mailto:labwens@gmail.com).**

### **01. What does WENS scholarship offer? Is it enough for living expenses?**

Scholarship includes full tuition fees until graduation and monthly stipend (depending on lab funding status) around 1,600,000 Korean Won per month for PhD and around 1,100,000 Korean Won per month for Masters. Tuition fees will be paid separately. We hope this amount is well customized to cover one's monthly simple living expenses. Note that scholarship doesn't include flight tickets. The amount of scholarship can be changed based on lab fund condition.

The total scholarship would be about 22,000,000 KRW/year for PhD and about 18,000,000 KRW/year for MS student. Total scholarship includes tuition fees, monthly stipend, various costs related to academic activities such as participation of domestic/international conference, journal publications, on/offline education (if necessary). Again, the total amount can be changed based on lab fund condition.

### **02. What about Accommodation?**

The dormitory is not recommended right now, as the cooking facility in the dormitory kitchen is closed for those who have particular food requirements and would like to cook themselves (Muslims, for example). Others can stay in the dormitory if they want to eat in the dormitory cafeteria. There could be private residence (Apartment). Single room: about 300,000 Korean Won/month (Gas and Electricity included) with deposit around 1,000,000 ~1,500,000 Korean Won. You can share with lab mates: about 150,000~200,000 Korean Won/ month (Not always available though). This must be handled with your monthly stipend.

### **03. Is there an age limit for WENS Lab scholarships?**

There is no fixed age limit.

### **04. I have not completed my university degree at the time of application. Am I still eligible to apply for a scholarship?**

Yes, you must submit your "Certificate of Expected Graduation" and satisfy all the academic requirements specified in the Call for Applications by the time studies begin. You should submit your degree certificate before studies begins.

### **05. I'm already in Korea. Am I still eligible to apply?**

Yes, you are not only eligible but also beneficial for applying.

## **06. Is English the only required language?**

Yes, formal English score is mandatory for entrance into kit and is the medium language in our lab. All courses are offered in English for International students. Meanwhile if you are interested in learning some Korean language, you can attend classes (Optional and free of charge) offered by the international office.

## **07. Do we need any English test score?**

Yes, it is compulsory except that only the ones born in countries where English is native language (e.g. UK, Australia, USA etc) are exempted. Otherwise you need to submit the following formal English test score (taken within 2 years). Notice that your English medium certificate from your university is not accepted.

Section	TOPIK	TOEFL (PBT)	TOEFL (CBT)	TOEFL (IBT)	IELTS	TEPS
Masters' & Doctoral Candidates	Level 3	550	210	80	5.5	550

However, for kit internal scholarship, you may need the following scores.

Minimum language test score for Type A and B scholarship is as below.

Scholarship Type	TOEFL (PBT)	TOEFL (CBT)	TOEFL (IBT)	TOEIC	New TEPS	TEPS	TOPIK	IELTS
Type A (100% of tuition fee)	597	247	99	850	386	700	Level 5	7.0
Type B (50% of tuition fee)	570	230	85	750	327	600	Level 4	6.0

## **08. Are lab projects a team work or individual?**

Lab projects can be a team work or individual. In addition, the research work could be individual and/or team based. However, it would be encouraged to research together.

In addition, the Lab projects may be independent to your research work. However, it would be encouraged to have a research topic related to the project.

For the ongoing projects refer to: <http://wens.re.kr/home/projects/ongoing>

There are several in-house projects too.

## **09. What are the research areas offered by the WENS Lab?**

Please refer to the WENS Lab home page: <http://wens.re.kr>. However, we encourage all the students try to find their own research topics with related to our lab's research interests.

## **10. Do we have a separate space for work?**

Yes, you will be provided with a separate own office space in the Lab with your personal office computer and the equipment needed for your research and Lab projects.

## **11. What is the Lab timing?**

Our lab timing is from 10 am to 7 pm from Monday till Friday. The timings have to be followed; you can take them as office timings. Lab is open 24 hrs., so it is your choice if you want to stay late but you are free to do your own work or go for home after 7:00 Pm. Usually Lab has two regular meeting per week such as research progress meeting and projects related meeting. The study atmosphere is so cool; you will enjoy yourself (guaranteed).

## **12. Will I choose the research topic myself or will I be provided one?**

You are entirely free to work on any topic of their choice (anything related wireless, network, etc.), however you can ask help from colleagues/supervisor and discuss it with them. We recommend you have to get more than 2 research topics for masters and 3 for PhD students.

## **13. Can I gain some teaching experience?**

We don't have teaching assistance program. For teaching experience, you need different type of VISA which is almost impossible to get.

## **14. How is the supervisor attitude?**

Well, it's very hard to answer but the supervisor is very sociable (want to believe like this 😊) and you will be put in the best possible conditions of studying.

## **15. What are the requirements to acquire the Degree?**

Following are the requirements (Details could be changed)

### **Master:**

- 1) One Journal publication (SCI or SCIE) within 2 years
- 2) 24 Credits Course work (almost 8 courses depending on the credits of the course)
- 3) Research Thesis work

**Master / PhD Integrated :**

## 1) Publications

Graduation period (year)	SCI Points Required
5	5
5.5	4
6	3
6.5	2

SCIE top 5% : 2.5 points

SCIE top 10% : 2 points

SCIE Q1 Journal : 1.5 points

Other SCIE (Q2,Q3,Q4) Journal : 1 point

SCOPUS/Domestic Journal : 0.25 point (counted up to 1 point/4 papers.)

\* No open access journal will be counted (counted only when professor permits.)

\* First author only

## 2) 60 Credits Course work (almost 20 courses depending on the credits of the course)

## 3) PhD. Research Dissertation

**PhD:**

## 1) Publications

Graduation period (year)	SCI Points Required
3	6
3.5	3.5
4	3
4.5	2
5	1

SCIE top 5% : 2.5 points

SCIE top 10% : 2 points

SCIE Q1 Journal : 1.5 points

Other SCIE (Q2,Q3,Q4) Journal : 1 point

SCOPUS/Domestic Journal : 0.25 point (counted up to 1 point/4 papers.)

\* No open access journal will be counted (counted only when professor permits.)

\* First author only

## 2) 36 Credits Course work (almost 12 courses depending on the credits of the course)

## 3) PhD. Research Dissertation

NOTE 1: Learning Korean language is not compulsory for either Masters' or PhD degree. Also, you might be asked to write conference paper/s during the duration of your degree which will be funded by the WENS

lab. However, if you want to get a job in Korea, it would be much better if you can speak/read/write in Korean.

***16. How is the career prospect after graduation?***

After completing your degree, you will have the required skills to further your studies or work in South Korea. Getting a job in Korea depends on your performance and available opportunities. There are a lot of foreigners working in Korea who have graduated from different Korean universities. Almost 90% of the jobs require Korean language.

***17. Is South Korea safe? How is living in Gumi?***

South Korea is incredibly safe and crime statistics are low. Walking about and catching public transport late at night is considered safe, but this does not mean that you should forget your usual common sense safety precautions. Quiet and calm, Gumi is the largest industrial complex city in Korea. It is home of Samsung mobile and LG Display

***18. How to reach GUMI from International Airport?***

Gumi is almost 3.5 hours far from Seoul (Incheon Airport). After you reach the Incheon International Airport and get clearance from the transport control, you can simply ask the information desk located outside the baggage control area about the ticket counter for bus service.

Once you reach the ticket counter (which is located almost at the exit/ entrance of the airport), ask the person on the counter to give you a next available ticket to Gumi City.

Note: Once you are selected for the scholarship, the WENS members will update you about the bus timings and how much the ticket costs.

***19. Due to some situations, I cannot get a formal recommendation letters from my previous supervisor (professor). Can I apply?***

Any kind of recommendation letters will be fine such as e-version. Try to get your professors' letter by email. That will be better.
